## SUNDAY, MARCH 29

### Top ROI Home Improvements

**10:30 AM** - Increase your return on investments (ROI) by upgrading your home's energy efficiency by installing passive solar systems, smart thermostats, and effective insulation all while using tax credits and rebates to help pay for upgrades. Hear from a panel of individuals – a solar company, HVAC contractor, and a utilities expert.

Presented by: *Ethos Green Power Co-Op, Heyer Heating & A/C*

### Design and Build an Energy Efficient Home on a Budget

**11:30 AM** - Looking to build a new home, but feel that rising costs are keeping you from achieving your dream? You're not alone, whether this will be a first home or a retirement oasis, a Focus on Energy Building Performance Consultant and a residential designer from Balduzzi's will provide pro tips and advice to help you save money during the build process from selecting the right piece of land to picking out the best performing building materials. Join us for a half-hour session that will leave you excited about starting your home building journey.

Presented by: *Balduzzi's*

### Prepping Your Home for Resale: Money Well Spent

**12:30 PM** - Explore the do's and don't of getting your home ready to list on the market. While some upgrades help increase your property value, others may not equate to a return on investment. Hear from a panel of top agents who can help you obtain the most equity from a home sale.

Presented by: *Gerrard-Hoeschler Realtors*

### Building a Future: Today's Up and Coming Trade Professionals

**1:30 PM** - Learn about what young trade professionals are bringing to the future for home building.

Presented by: *Western Technical College Apprenticeship Program*
